

ANKITHA G S

AI/ML Engineer | Python Backend Developer

ankithags44@gmail.com | +91 8310150503 | Bengaluru | linkedin.com/in/ankitha-gs | github.com/Ankitha-GS

SUMMARY

Python Developer and AI/ML Enthusiast with hands-on experience in developing AI-powered applications, RAG systems, REST APIs, and machine learning solutions using Python, FastAPI, LangChain, TensorFlow, and SQL. Strong foundation in software development, problem-solving, and computer science fundamentals with a passion for building scalable and impactful applications.

TECHNICAL SKILLS

Languages

Python, Java, SQL

CS Core

DSA, OOP, DBMS, Operating Systems, Computer Networks

AI / ML

Machine Learning, NLP, RAG Systems, LangChain, TensorFlow, Scikit-learn, Sentence Transformers

Backend

FastAPI, Flask, REST APIs, Gemini API

Databases

MongoDB, PostgreSQL, MySQL, Firebase, ChromaDB

INTERNSHIPS

MindMatrix

02/2026 – 06/2026 | Bangalore(Remote)

Android App Development (Gen AI)

- Developed Android applications using Kotlin and Firebase with AI-assisted development workflows and modern mobile architecture.
- Built WorkConnect hiring app in Kotlin with Firebase backend, authentication, and real-time user management using AI-assisted development workflows.

Sonata Software

11/2025 – 02/2026 | Bengaluru(Remote)

Data Analytics Trainee

- Analyzed business datasets using SQL, Power BI, and Tableau; built executive dashboards for KPI reporting adopted across cross-functional teams.
- Performed data cleaning, EDA, and preprocessing pipelines to improve reporting accuracy and business intelligence workflows.

PROJECTS

RAG Document Q&A System

LangChain · ChromaDB · Gemini API · FastAPI · Streamlit

- Built multi-format RAG pipeline (PDF/DOCX/TXT) with configurable chunking, local HuggingFace embeddings, and streaming responses via SSE — fully free-tier deployable.
- Developed LLM-as-judge eval framework measuring faithfulness (0.91) and relevance across a 10-question test set; ran chunk-size sweep (200/500/1000) and documented trade-offs in README.
- Deployed on Streamlit Cloud with FastAPI backend; public GitHub with live demo, eval results, and design decisions.

AI Hire – Resume Screening & Job Matching Platform

FastAPI · React.js · NLP · Scikit-learn · MongoDB

- Built NLP-based resume parser and semantic job-description matcher using cosine similarity; automated candidate shortlisting against structured JD keyword profiles.
- Designed scalable FastAPI REST APIs with JWT auth; React.js frontend with recruiter dashboard showing match scores, missing skills, and ATS pass rates per job.

Multiple Disease Prediction System

Python · Scikit-learn · TensorFlow · Streamlit

- Trained SVM, Logistic Regression, and Random Forest classifiers on clinical data for diabetes, heart disease, and Parkinson's — 89%+ accuracy; handled class imbalance via SMOTE.
- Built end-to-end ML pipeline: feature engineering, hyperparameter tuning, cross-validation, and ROC-AUC evaluation; deployed as an interactive Streamlit web app.

EDUCATION & CERTIFICATION

B.E – Information Science & Engineering

2022 – 2026 | Bengaluru

Sai Vidya Institute of Technology, Bengaluru

CGPA: 9.2 / 10.0

Artificial Intelligence & Machine Learning

2025

IBM SkillsBuild

ACHIEVEMENTS

- CGPA 9.2 / 10.0 — consistently top 5% of department.
- IBM SkillsBuild AI/ML certification — completed modules on supervised learning, neural networks, and NLP.
